DETAILED ACTION

This is the non-final Office Action for application number 10/696,128 Product Display, filed on 10/29/03. Claims 1, 3, 5-8, 11, 14, 15 and 17-20 are pending. This non-final Office Action is in response to applicant's reply dated 3/29/06. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant's amendment necessitated any new ground(s) of rejection presented in this Office action.

Claim Objections

Claim 14 is objected to for being depending upon a cancelled claim. The claim was not examined in this action, but is considered fully rejected in any subsequent action.

Claim Rejections - 35 USC § 102

Claims 8 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent No. 4291807 to Giordano et al.

The patent to Giordano et al. discloses a holder for goods (35) having a front panel (36) including a front portion and a back portion and having an opening therethrough (40, 41), a bottom panel (24) connected to the front panel, a back panel (20) connected to the bottom panel and front panel and a flap (25, 31, 30a) connected

to the back panel, the flap being bent downwardly and extending downwardly from the back panel and below the opening and toward portion of the front panel, wherein the flap provides a spring biasing force on the portion of the front panel so as to hold the goods in the opening.

Response to Arguments

Applicant's arguments with respect to claim 8 have been considered but are most in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 1, 3, 5-7, 15 and 17-20 are allowed.

With regards to claims 1, 3, 5-7, 15 and 17-20 the reason is that the prior art does not teach a holder for goods having a front panel with an opening therethrough, the front panel having a brace section which includes a flap, the flap being bent downwardly from the brace section and toward a back portion of the front panel to provide a spring biasing force on the back portion of the front panel so as to hold goods in the opening, in combination with a bottom panel connected to the front panel and a back panel connected to the bottom panel.
